Logo, color and typography basics · Version 1.0 · November 2026

01 · LOGO

The logo

The MyPro Products logo pairs a house mark with a checkmark: a home that is protected, prepared and taken care of. The wordmark is set in Inter ExtraBold, with "Pro" in Stone. Always use the supplied artwork; never retype or redraw the logo.

Primary: horizontal. Use this version first, wherever it fits.

Stacked. For square or tall spaces.

Mark. App icons, avatars, favicons.

Reversed for dark backgrounds.

White for blue or photo backgrounds.

Black for one-color print, fax and stamps.

01 · LOGO

Clear space and minimum size

Keep an empty margin around the logo at least the height of the house mark's window (**X**). Nothing (text, edges, other logos) should enter that space.

Minimum size

Horizontal logo: 1.25 in / 140 px wide

Stacked logo: 0.9 in / 100 px wide

Mark alone: 0.25 in / 24 px wide

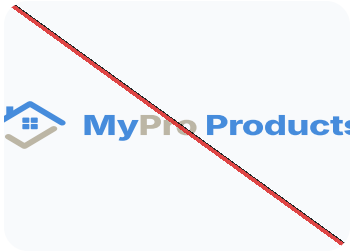

File formats

SVG: web and anything that scales

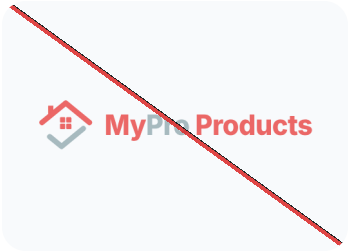

PNG: documents, slides, social posts

ICO / small PNG: browser favicons

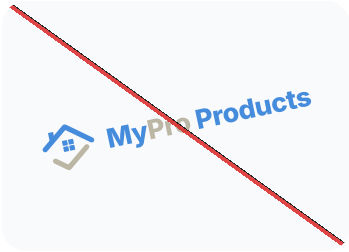

PLEASE DON'T

Stone is too light for small text on white. Use Stone Dark for text, and keep Stone for the logo, large accents and fills. CMYK values are conversions; ask your printer to match the HEX swatch.

03 · TYPOGRAPHY

Typeface: Inter

Inter is the MyPro Products typeface, used on the website and in the wordmark. It is free from Google Fonts (fonts.google.com/specimen/Inter). Use Arial as a fallback where Inter isn't available.

Prepared homes. Faster recovery.

Headlines: Inter ExtraBold, tight letter spacing (-2%)

Disaster prep, claims and vetted repair pros in one ecosystem.

Subheads: Inter SemiBold

MyPro Products helps property owners, managers and carriers get ready before a storm and recover faster after one.
